🐙 github.com/ChaitanyaGidwani

Summary

Computer Science undergraduate and full-stack developer who ships production-grade AI products end to end, from multi-source data pipelines and multi-agent backends to real API integrations and cloud deployment. Proficient in JavaScript/TypeScript, Python, and Java, with hands-on experience embedding LLMs (Groq, Gemini) into real applications. Hackathon runner-up and SIH 2025 qualifier seeking a **Software Developer** / software engineering internship.

Education

ABES Engineering College (Affiliated with AKTU)

Bachelor of Technology in Computer Science and Engineering

2024 - 2028

Ghaziabad, India

Projects

Argus: Student Opportunity Aggregator & AI Insight Platform

2026

Next.js 16, React 19, TypeScript, Tailwind, Firebase/Firestore, Groq & Gemini LLMs, Web Push

🔗 opportunity-radar-theta.vercel.app · 🐙 github.com/ChaitanyaGidwani/opportunity-radar

- Architected a full-stack platform aggregating **200+ live opportunities** (internships, scholarships, hackathons, competitions) from **14 source adapters** fetched server-side with caching, deduplication, and per-source health monitoring.
- Engineered a transparent **6-signal weighted ranking engine** (skill, interest, urgency, recency, popularity, location) with eligibility filtering and a free "why this matched you" explanation on every result card.
- Integrated a **dual-LLM backend** (Groq Llama 3.3 with Gemini failover) powering **8 AI features** such as summaries, resume analysis, smart tags, and natural-language search, with 7-day response caching.
- Shipped a multi-channel deadline reminder system (Web Push/VAPID, email via Resend, one-tap .ics/Google calendar export) firing across **5 stages** from T-14d to T-3h.

MarketMind: Multi-Agent AI Marketing Platform

2025

Python, FastAPI, Pydantic, React, Vite, SQLite, Docker Compose, Groq Llama 3.3

🐙 github.com/ChaitanyaGidwani/MarketMind

- Designed a **multi-agent system** where an orchestrator scores agent bids, allocates budget, and dispatches **6 specialized agents** (content, ads, email, SEO, analytics) in parallel over an A2A-style JSON-RPC + SSE protocol.
- Developed a re-negotiation loop (capped at 3 rounds) with a **110% budget guard** and real-time SSE progress streaming to a campaign dashboard with live ROI charts.
- Containerized **8 microservices** with Docker Compose and environment-driven service discovery.

LaunchCopilot: AI Launch Automation Platform

2026

Next.js 15, Supabase (PostgreSQL), Groq Llama 3.3, Zod, Vercel Cron, OAuth

🔗 2026-07-ethos-engineers.vercel.app · 🐙 github.com/ChaitanyaGidwani/LaunchCopilot

- Built an AI platform that reads an App Store / Play Store link and generates **channel-native launch copy** for **5 platforms** (ASO, X, LinkedIn, Product Hunt, Reddit), enforcing each platform's conventions with visible compliance checks.
- Implemented a real **publishing engine** posting live across **5 channels** (Reddit, Telegram, X via OAuth 1.0a, LinkedIn via OAuth 2.0, and Discord) with autopilot scheduling executed by a daily Vercel cron job.
- Added a **closed-loop optimizer** that tracks installs across all 5 channels and AI-rewrites the weakest performer with a data-driven hypothesis and changelog.
- Recognized as **runner-up** at HackOnVibe 2026 for this build.

Professional Experience

Technovation, The Networking Club (ABESEC) | Technical Team Member

Jun 2025 - Present

Ghaziabad, India

- Volunteered on the core technical team to organize **2 major campus programs**: CyberQuest (the club's college-level flagship technical event) and a **5-day** offline Quantum Computing workshop, coordinating registrations, logistics, participant onboarding, and on-ground technical operations.

Skills

Languages: Java, JavaScript, TypeScript, Python, C, Solidity, SQL

Frameworks/Libraries: Next.js, React, Node.js, FastAPI, Tailwind CSS, Chart.js, Framer Motion

AI & LLM: Groq (Llama 3.3), Google Gemini, RAG, Agentic & Multi-Agent Systems, Prompt Engineering

Databases & Cloud: PostgreSQL, Firebase/Firestore, Supabase, SQLite, Docker, Vercel, Netlify

Tools & Platforms: Git, GitHub, Firebase, VS Code, Claude Code, Cursor; proficient with AI-assisted development tools

Achievements & Activities

- Cleared the **Smart India Hackathon (SIH) 2025** internal round, selected from 328 participating teams at ABES Engineering College.
- Secured **2nd place** at an intra-club Buildathon, shipping a working solution within the time limit.
- Placed **2nd (runner-up)** at the HackOnVibe 2026 online hackathon with LaunchCopilot.
- Open-source contributor during **Hacktoberfest 2025**, merging pull requests to public GitHub repositories.
- Student Member of IEEE ABES-EC; Member of NSS & Trishul clubs, ABESEC.
